about me

An experienced web developer with a strong foundation in HTML, CSS, Javascript, libraries and frameworks. A highly skilled and adaptable professional with a strong foundation in technical skills and a range of interpersonal skills that allow to effectively collaborate, communicate, and solve problems in a team-oriented environment. A goal driven and highly motivated team player with potential to take on leadership responsibilities.

professional experience

2014 – CURRENT

Frontend Developer

Osman WD | Durban, South Africa

- Successfully engineered and built responsive web applications and eCommerce stores with advanced features and integrations.
- Skilled in translating design to code and implementing successful UX & UI design.
- Experience connecting to API services, working with headless CMS websites, and integrating with third-party payment gateways.
- Proficient in version control with Git and maintain a profile on GitHub with several repositories.
- Experience working with databases and the MySQL database software.
- Maintained front-end code for re-designs and production work.
- Assisted in the deployment of online marketing initiatives, including banner advertisements.
- Identified and implemented dynamic web solutions in accordance with client standards and best practices.
- Assisted a digital agency in developing WordPress sites, collaborating with design teams to take client wireframes from conception to implementation.
- Troubleshooting and updating throughout the production life cycle.
- Ensured projects complied with correct technology processes, industry best practices, and company standards.
- Conducted research and new business scoping efforts, resulting in the acquisition of new clients.
- Worked on projects in an Agile, collaborative environment to receive design requirements, peer program, and test applications.
- Proficient in digitising handbooks with tools that require authentication and a member dashboard.
